

5th Edition

Waste Management & Recycling Workshop

Moving The Kingdom of Saudi Arabia Towards A Sustainable Future And Zero Waste

11th & 12th October 2015, Le Meridian Hotel Jeddah, Saudi Arabia

Post Event Report

Researched & Developed by

Workshop Overview

With rapid urbanization and a growing population of 29.9 million people and rising, the per capita waste generated per person per day is between 1.5kgs to 1.8kgs, which makes waste management an increasingly important concern that needs to be addressed immediately.

Waste needs to be safely managed because it is potentially hazardous to the human health and the environment. Globally there has been a rapid change in environment due to the increasing waste generated from every sector running into Billion tons of waste produced per year. Hence, we at Nispana bring to you the **5th Edition of the Waste Management and Recycling Workshop**.

The theme of this Workshop is “Moving the Kingdom of Saudi Arabia towards a more Sustainable and Waste Free Future” and will feature topics related to Implementation of the 7 R's, The Importance of a Waste Management & Recycling System or Hierarchy, Government Mandates for Waste Management & Recycling, Waste Segregation, The Importance of Public Awareness Campaigns, Environmental Issues Caused by Waste, Waste to Energy, Recovery from Waste, Current Government Policies & Plans for Waste Management & Recycling and the Handling & Transportation of Hazardous Waste.

We encourage all relevant organizations both solutions seekers and solution providers to attend and actively participate in the **5th Edition of the Waste Management & Recycling Workshop 2015**

Testimonials

“It was a great workshop to improve waste management scenario in Saudi Arabia and valuable Topics should be the key in transforming Saudi Arabia into a ‘green’ nation.”

Prof. Akram Hassan, Advisor to the Deputy Mayor, **Holy Makkah Municipality**.

“Let me say “Waste Management & Recycling Workshop” held on 11th & 12th October 2015 in Jeddah, Saudi Arabia was very successful. Smiles on the faces of participants at the end of workshop was the proof that all participants were very happy with the throughout management of this workshop and realized that they got lot within this two days of Workshop. My heartiest congratulations to niSpana to take this initiatives to successfully arranged and managed this Workshop.

Being an Indian I am really feel proud for niSpana’s vision and mission- “Greener & Waste Free Future”. I am confident for the more and more success of niSpana because you have a team of expert professionals. I am really impressed with the hard works and best efforts of your team. You have very a very good teamwork.”

Nasr Husen Ahmed Lotiya, **Roots Steel**

“Our staff from Al Jedaani and Ibn Sina Hospital with the attendees from Philippine Society of Mechanical Engineers at the Western Region, are extending their appreciation to you and Nispana for a wonderful workshop, how we could protect our mother earth through segregation and recycling of everyday waste.

A vision of Zero waste for the future will not achieve if we will not start from ourselves at home and will not educate the children of every locality from their schools.

Being the member of Philippine Society of Mechanical Engineers in the Western Region of Saudi Arabia, Green Environment and Sustainable Energy are what we dreamed since before.

Once again, many thanks to Nispana for a chance given to our group and if you will have some seminars about Green Engineering and Sustainable Energy in the future, please let me inform.

Thank you very much and more power to Nispana ...”

Eng’r. Jaime L. Leviste, Support Services Manager, **Al Jedaani Group & Medical Colleges**

“Thank you very much for you and for Nispana staff. This will not succeed without your arrangement and your support.”

Abdullah M. Al-Hemdi, Quality Control & Environment Department, **Yanbu Cement Company**

“Many thanks for Nispana for a great and productive work shop being in Jeddah.”

Mr. Saleh Khalaf Alharbi, Civil Engineer, **General Directorate Of Water - MOWE**

Acknowledgment

We would like to express our sincere gratitude to everyone who contributed to the success of this event. In particular, the speakers, the public engagement and the sponsors without which the conference would not have been possible. We also thank the Ministry of Health, Saudi Arabia, The Royal Commission of Jubail and all other associations & media partners for making this workshop a grand success.

Company Profile

Nispana Innovative Platforms Pvt. Ltd. founded in April 2010 is a professional Business Information company headquartered in Bangalore, India and our international offices are based out of Dubai, and USA. At Nispana, we believe that there is no better business referral than that given by a satisfied client. That's why we are committed to finding out what exactly our client's needs are and delivering solutions that meet and often exceed expectations.

Nispana provides the world's business leaders a true B2B platform with a competitive edge. We are proud to be working in partnership with many leading press groups and local authorities. We provide business executives with tailored practical conferences, forums and trainings, keeping them up to date with industry trends and technological developments. We guarantee them new ideas and new contacts to continue doing what you do in a much different and simplified way.

We invite industry experts and world class accredited trainers to speak and train at our conferences, forums & trainings. They share their case studies, network with peers, re-educate themselves and do business in a faster and effective way. These business platforms will give our clients a cutting edge agenda which will let them go back with the right answers to their queries.

At Nispana we focus on providing a true ROI on both time and money invested. Nispana is multicultural, dynamic and focused on business performance.
